

Release Date: Q1 2012	
Version: 4.00	
Feature	Description
<b>Blackberry Core Target Functionality / Infection Bundle Generation</b>	The core target functionality: communication, encryption, support for data collection modules, gather system/device information
<b>Blackberry Data Collection Module: SMS</b>	Record all incoming / outgoing SMSes
<b>Blackberry Data Collection Module: Phone Call Logs</b>	Record all phone call logging information: conversation partner phone number, date-time, duration, status, positioning information during the call
<b>Blackberry Data Collection Module: Address Book</b>	Get all the entries with all the details from the Address Book and the phone numbers from SIM card
<b>Blackberry Data Collection Module: Spy Call</b>	The target answers silently to a phone call
<b>Blackberry Data Collection Module: Phone Call Interception</b>	Records a phone call between a target and another party.
<b>Blackberry Data Collection Module: Tracking</b>	Live tracking of the target.
<b>Blackberry Data Collection Module: Blackberry Messenger</b>	Record the Blackberry Messenger
<b>Android Core Target Functionality / Infection Bundle Generation</b>	The core target functionality: communication, encryption, support for data collection modules, gather system/device information
<b>Android Data Collection Module: SMS</b>	Record all incoming / outgoing SMSes
<b>Android Data Collection Module: Phone Call Logs</b>	Record all phone call logging information: conversation partner phone number, date-time, duration, status, positioning information during the call
<b>Android Data Collection Module: Address Book</b>	Get all the entries with all the details from the Address Book and the phone numbers from SIM card
<b>Android Data Collection Module: Spy Call</b>	The target answers silently to a phone call
<b>Android Data Collection Module: Phone Call Interception</b>	Records a phone call between a target and another party.
<b>Android Data Collection Module: Tracking</b>	Live tracking of the target.
<b>Windows Mobile Core Target Functionality / Infection Bundle Generation</b>	The core target functionality: communication, encryption, support for data collection modules, gather system/device information
<b>Windows Mobile Data Collection Module: SMS</b>	Record all incoming / outgoing SMSes
<b>Windows Mobile Data Collection Module: Phone Call Logs</b>	Record all phone call logging information: conversation partner phone number, date-time, duration, status, positioning information during the call
<b>Windows Mobile Data Collection Module: Address Book</b>	Get all the entries with all the details from the Address Book and the phone numbers from SIM card
<b>Windows Mobile Data Collection Module: Spy Call</b>	The target answers silently to a phone call
<b>Windows Mobile Data Collection Module: Phone Call Interception</b>	Records a phone call between a target and another party.
<b>Windows Mobile Data Collection Module: Tracking</b>	Live tracking of the target.
<b>Enhance the Master/Proxy/Relay to accept and handle requests/communication from Mobile Devices</b>	Support Mobile communication
<b>Enhance the Agent to support Mobile Devices</b>	Agent Mobile Devices support
<b>Mobile Targets Infection generation</b>	Infection generation
<b>Support for SMS sending to Mobile Targets</b>	Sending SMS e.g. configuration SMS

Release Date: Q1 2012	
Version: 4.00	
Feature	Description
<b>Windows Phone Core Target Functionality / Infection Bundle Generation</b>	The core target functionality: communication, encryption, support for data collection modules, gather system/device information
<b>Windows Phone Data Collection Module: SMS</b>	Record all incoming / outgoing SMSes

<b>Windows Phone Data Collection Module: Spy Call</b>	The target answers silently to a phone call
<b>Windows Phone Data Collection Module: Phone Call Interception</b>	Records a phone call between a target and another party.
<b>Windows Phone Data Collection Module: Tracking</b>	Live tracking of the target.
<b>Windows Phone Data Collection Module: Calendar</b>	Records all stored entries within the Calendar application
<b>iOS Core Target Functionality / Infection Bundle Generation</b>	The core target functionality: communication, encryption, support for data collection modules, gather system/device information
<b>iOS Data Collection Module: SMS</b>	Record all incoming / outgoing SMSes
<b>iOS Data Collection Module: Phone Call Logs</b>	Record all phone call logging information: conversation partner phone number, date-time, duration, status, positioning information during the call
<b>iOS Data Collection Module: Address Book</b>	Get all the entries with all the details from the Address Book and the phone numbers from SIM card
<b>iOS Data Collection Module: Spy Call</b>	The target answers silently to a phone call
<b>iOS Data Collection Module: Phone Call Interception</b>	Records a phone call between a target and another party.
<b>iOS Data Collection Module: Tracking</b>	Live tracking of the target.
<b>iOS Data Collection Module: Calendar</b>	Records all stored entries within the Calendar application
<b>Symbian Core Target Functionality / Infection Bundle Generation</b>	The core target functionality: communication, encryption, support for data collection modules, gather system/device information
<b>Symbian Data Collection Module: SMS</b>	Record all incoming / outgoing SMSes
<b>Symbian Data Collection Module: Phone Call Logs</b>	Record all phone call logging information: conversation partner phone number, date-time, duration, status, positioning information during the call
<b>Symbian Data Collection Module: Address Book</b>	Get all the entries with all the details from the Address Book and the phone numbers from SIM card
<b>Symbian Data Collection Module: Spy Call</b>	The target answers silently to a phone call
<b>Symbian Data Collection Module: Phone Call Interception</b>	Records a phone call between a target and another party.
<b>Symbian Data Collection Module: Tracking</b>	Live tracking of the target.

<b>Symbian Data Collection Module: Calendar</b>	Records all stored entries within the Calendar application
<b>Blackberry Data Collection Module: Calendar</b>	Records all stored entries within the Calendar application
<b>Android Data Collection Module: Calendar</b>	Records all stored entries within the Calendar application
<b>Windows Mobile Data Collection Module: Calendar</b>	Records all stored entries within the Calendar application
<b>Release Date: Q1 2012</b>	
<b>Version: 4.00</b>	
<b>Feature</b>	<b>Description</b>
<b>iOS Data Collection Module: WhatsApp</b>	Intercept and record the messages/files exchanged with WhatsApp application
<b>iOS Data Collection Module: Email</b>	Record all exchanged emails
<b>Blackberry Data Collection Module: WhatsApp</b>	Intercept and record the messages/files exchanged with WhatsApp application
<b>Blackberry Data Collection Module: Email</b>	Record all exchanged emails
<b>Android Data Collection Module: WhatsApp</b>	Intercept and record the messages/files exchanged with WhatsApp application
<b>Android Data Collection Module: Email</b>	Record all exchanged emails
<b>Symbian Data Collection Module: WhatsApp</b>	Intercept and record the messages/files exchanged with WhatsApp application
<b>Symbian Data Collection Module: Email</b>	Record all exchanged emails
<b>Windows Mobile Data Collection Module: Email</b>	Record all exchanged emails
<b>Windows Phone Data Collection Module: Email</b>	Record all exchanged emails
<b>Release Date: Q1 2012</b>	
<b>Version: 4.00</b>	
<b>Feature</b>	<b>Description</b>
<b>iOS Data Collection Module: Skype</b>	Intercept and record any kind of message/file/voice exchange using skype; record the contacts
<b>iOS Data Collection Module: File Access</b>	Live session module which allows the user to browse the mobile target file system (similar with the PC File Access module)
<b>Blackberry Data Collection Module: Skype</b>	Intercept and record any kind of message/file/voice exchange using skype; record the contacts
<b>Blackberry Data Collection Module: File Access</b>	Live session module which allows the user to browse the mobile target file system (similar with the PC File Access module)
<b>Android Data Collection Module: Skype</b>	Intercept and record any kind of message/file/voice exchange using skype; record the contacts
<b>Android Data Collection Module: File Access</b>	Live session module which allows the user to browse the mobile target file system (similar with the PC File Access module)
<b>Symbian Data Collection Module: Skype</b>	Intercept and record any kind of message/file/voice exchange using skype; record the contacts
<b>Symbian Data Collection Module: File Access</b>	Live session module which allows the user to browse the mobile target file system (similar with the PC File Access module)

<b>Windows Mobile Data Collection Module: File Access</b>	Live session module which allows the user to browse the mobile target file system (similar with the PC File Access module)n
<b>Windows Phone Data Collection Module: File Access</b>	Live session module which allows the user to browse the mobile target file system (similar with the PC File Access module)
<b>Release Date: Q1 2012</b>	
<b>Version: 4.00</b>	
<b>Feature</b>	<b>Description</b>
<b>iOS Data Collection Module: Keylogger</b>	Record all the keystrokes on the phone
<b>iOS Data Collection Module: PowerOff</b>	Enable the agent with the capability to power off the phone
<b>Blackberry Data Collection Module: Keylogger</b>	Record all the keystrokes on the phone
<b>Blackberry Data Collection Module: PowerOff</b>	Enable the agent with the capability to power off the phone
<b>Android Data Collection Module: Keylogger</b>	Record all the keystrokes on the phone
<b>Android Data Collection Module: PowerOff</b>	Enable the agent with the capability to power off the phone
<b>Symbian Data Collection Module: Keylogger</b>	Record all the keystrokes on the phone
<b>Symbian Data Collection Module: PowerOff</b>	Enable the agent with the capability to power off the phone
<b>Windows Mobile Data Collection Module: Keylogger</b>	Record all the keystrokes on the phone
<b>Windows Mobile Data Collection Module: PowerOff</b>	Enable the agent with the capability to power off the phone
<b>Mobile Target Data Collection Module: Keylogger</b>	Record all the keystrokes on the phone
<b>Mobile Target Data Collection Module: PowerOff</b>	Enable the agent with the capability to power off the phone
