

## **HT Bios**

### **Mr. Velasco**

Mr. Alex Velasco is a Key Account Manager for HackingTeam Srl. He heads the USA office and oversees projects from North America to South America. Alex has worked with most intelligence agencies in Europe, Northern America and Latin America. After spending 10 years spearheading intelligence and monitoring projects in France Mr. Velasco moved his family to the Washington DC area to continue his work with the Intelligence community. With over 22 years of helping Law Enforcement find the right solution for their projects, Cyber Intelligence is the language he speaks now. During this event he will speak about RCS Da Vinci and how it is changing the future of intelligence gathering and monitoring.

### **Mr. Pelliccione**

Alberto Pelliccione joined HackingTeam in January 2008 and was quickly given the charge of research and development on all mobile platforms. He developed the stealth application for intelligence gathering for the most popular hand held devices in the world. Mr Pelliccione's 15 years of experience in reverse engineering has made him a popular instructor with governmental agencies everywhere he travels. He teaches computer security and vulnerability research. He is also considered one of the world's experts with in-depth Malware, rootkit and exploit analysis. Lately has developed a deep interest and understanding of the recent rise of APTs. His passions are artificial intelligence and working with autonomous robots. He is also passionate about challenges that requires a strict out-of-the-box mindset attitude and solving an issue. He is currently studying cryptanalysis and new ciphers.
