

What's new in Remote Control System Update 9.5.1

Agent (Windows)

- Invisibility enhancements for various AV

Agent (Android)

- Fixed Uninstall error
- Fixed Telegram multiuser bug

How to install the update

The update can be installed on any 9.5.x version. It's a cumulative update.

9.5.1 specific instruction:

- Run the installer `rcs-setup-*.exe` on each backend server and answer 'yes' when asked to upgrade
- Run the installer `rcs-setup-*.exe` on each frontend server and answer 'yes' when asked to upgrade
- If you have previously installed the `rcs-ocr-*.exe` on the shards, you have to reinstall it as well.
- The Network Injector has not been changed, so you can use the 9.5.0 installer.
