

Programming Device
DAS 4005 PROG 150 100 0042

Remote Control Systems - 150

Programming device – DAS 4005 PROG

General

The programming device serves for individual setting of the remote control address and the DES encryption code of the audio transmission system DAS 4005 RC.

By means of the programming device all 16 address-bits can be set, since the DAS-RX 4005 RC only allows adjustment of the first 4 bits of the remote control address.

The DES encryption code of the digital audio transmission system DAS 4005 RC comprises a total of 56 bits of which 16 bits can be adjusted by means of the programming device. If only one bit of the DES encryption code is changed, the received signal will not be analyzable.

Technical Data

Power supply	1 battery, type AAA
Power consumption	
Reception	27 mA
Transmission	26 mA
Output power	1 mW
Transmission frequency	444.9756 MHz
Receiving frequency	444.9756 MHz
Receiver sensitivity	-93 dBm (BER = 10³)
Antenna	PCB-Loop
