

TSE 6908 Digital Audio Recorder
built into a belt

DIGITAL RECORDER BUILT INTO BELT

Model 6908 is a member of our line of the latest technology available for covert recording. Solid state electronics enclosed in a belt, assures inconspicuous evidence recording. Data is transferred to any PC via the Field Support Unit, or by use of an external Parallel Interface Unit which provides connectivity via a parallel port. Standard audio hardware commonly found on most PCs may be used for data playback. User software running under Windows XP will cut recordable CD media for archive, and can also create audio CDs which can be played on any CD player.

System Features:

Local Record START/STOP
 Playback via Standard Audio Cards
 Programmable Timer ON/OFF
 13.4 hours Record on one AA Battery
 Local Microphone input
 Interface to Parallel Port
 1:1, 2:1, 4:1 record compression

Delivery

Main recorder
 Belt
 interface cable
 Charger
 software
 Microphone
