

**TSE 6911 Digital Audio Recorder**  
built into a keyring

### DIGITAL RECORDER BUILT INTO A CAR KEY RING

Model 6911 is a member of our line of the latest technology available for covert recording. Solid state electronics enclosed in a key ring, assures inconspicuous evidence recording. Data is transferred to any PC via the Field Support Unit, or by use of an external Parallel Interface Unit which provides connectivity via a parallel port. Standard audio hardware commonly found on most PCs may be used for data playback. User software running under Windows XP will cut recordable CD media for archive, and can also create audio CDs which can be played on any CD player.

Ultimate Covert Recording in: Cars-Office-Restaurants.
