

**TSE 6701**  
**Wired Concealment Kit**  
(Cameras)

## TSE 6701 WIRED CONCEALMENT KIT

The **TSE Board Camera Kit** provides an assortment of portable high quality, low light miniature board cameras for a variety of covert installations.

All the cameras have industry standard RCA and 2.1mm power plugs and cable that attach to the camera bodies via quick connectors. The flexible video power cables allow the cameras to be positioned at any angle for the best possible camera view and operate at 9 – 13.5 vdc.

The cameras are encased with protective coverings allowing installations in tight confinements without shorting the camera circuitry.

Wide angle and pinhole lenses provide a variety of near and far camera views with some cameras allowing interchangeable lenses.

The TSE Board Camera Kit is packaged in a rugged ABS case with snap and lock lid with a custom foam insert for camera separation and shock protection during transportation.
